Case Study: Data Conversion of JD Edwards EnterpriseOne to SAP R/3

Solution Summary

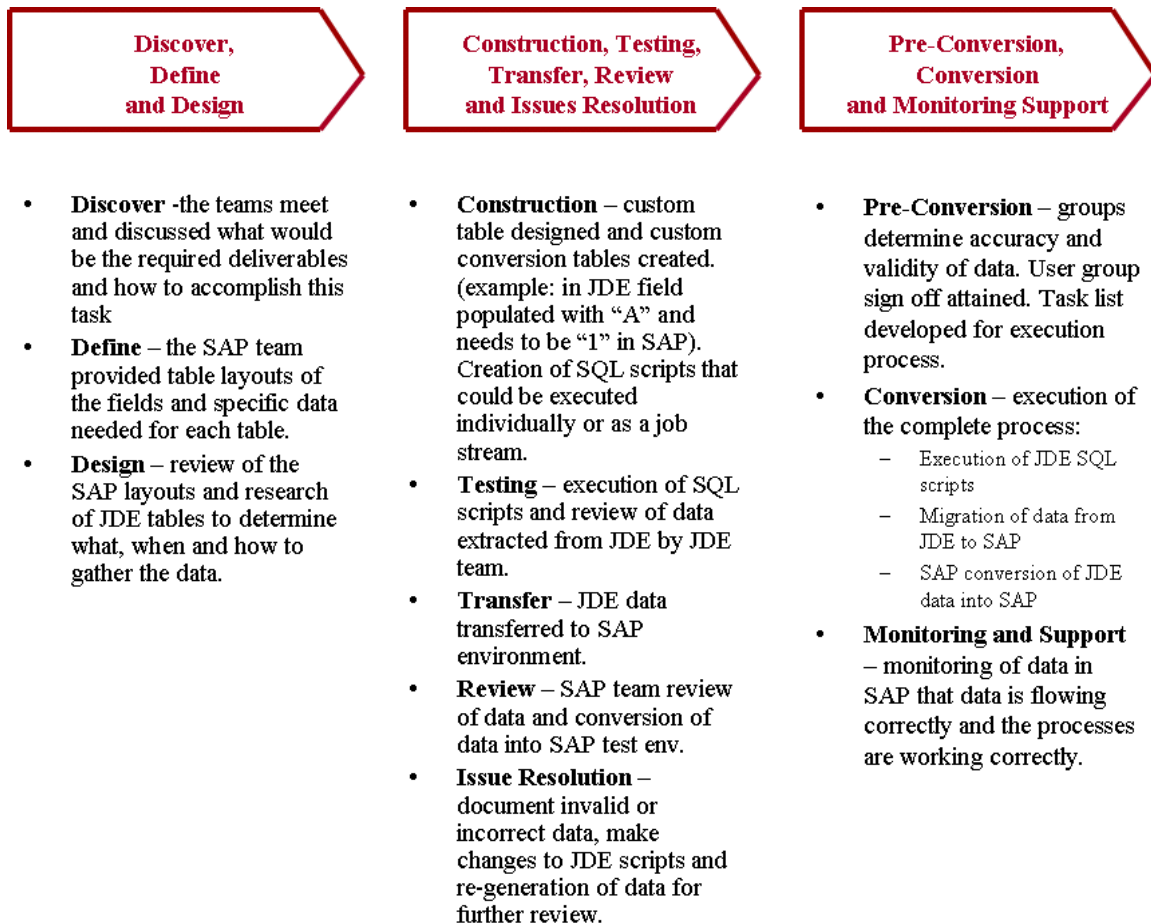

Our client is a leading manufacturer and distributor of Electric and Automation products. The client was acquired by a leading one-source supplier of electronic, electrical and fiber optical interconnects to switches and application tooling. After the acquisition, there was an immediate need for a quick and seamless data conversion with the client's business and IT systems apart from providing application support to their existing systems.

Solution Profile

This Case Study is on the Data Conversion of JD Edwards EnterpriseOne database to SAP R/3 database.

The scope of the project included Data Conversion of Master files and History files from JDE existing database. Transfer data to SAP test database and converting into SAP existing production database. The challenge was to deliver the deliverables under the pressure of an aggressive schedule and limited funding.

R S InfoCon conducted the following activities / tasks to complete this initiative for our client by using the following methodology:

With the use of R S InfoCon Methodology above we were able to layout the big picture of how the process will flow and work which, enabled us to open up the proper communication channels so we had the right people in place from the user community.

Distinguishing Feature

The project was delivered **On Time, Within Budget and with no Compromise on Quality**. R S Infocon consultants worked closely with the acquired company to understand the complete mapping process. Designed and developed the entire process. As required by the client all the master files and History files provided with comma separated files (.CSV) and FTP'd to their FTP Server. RSI has developed a repeatable conversion process that would allow client to execute their data conversion exactly as they envisioned. This successful data conversion from JDE to SAP R/3 demonstrated R S InfoCon capabilities to effectively Project Manage, Design, Develop and Implement.
